## PrEP in Ecuador

Corporacion Kimirina and the Ministry of Public Health in Ecuador launched a PrEP program in 2019, offering telematic services to increase accessibility and reach a wider population.

## Telematic System

The program utilizes a telematic system incorporating social networks, interactive video calls, and digital health records for scheduling, consultations, and secure data storage.

## Increased Access

The number of individuals accessing PrEP has significantly increased since its inception, reaching over 1,300 individuals by July 2023.

## Geographic Reach

The telematic system has enabled PrEP services to be accessible across 22 out of 24 provinces in Ecuador, reaching a wider geographical area.

## PrEP Success

The telematic PrEP program in Ecuador has proven successful in expanding access to PrEP services, reaching more individuals, and contributing to the goal of ending the AIDS epidemic by 2030.
